Subject: The NORDAM Group LLC - Extension of CAAC MOC Approval – Cert No. F00100400

To Whom It May Concern,

This letter is to inform you that The NORDAM Group LLC has received special temporary approval from the Civil Aviation Administration of China (CAAC), via their Flight Standard Oversight Program portal to extend the validity of our CAAC Part 145 Maintenance Organization Certificate F00100400, which would have expired December 30, 2022.

By special consent, the expiration date has been extended until June 30, 2023. The CAAC was unable to submit our permission renewal application before the expiration date on the approval certificate owing to travel limitations imposed by COVID-19, which prevented an on-site audit.

This temporary approval is valid until we have received any other formal approval issued by the CAAC or the date of June 30, 2023, whichever comes earlier. The NORDAM Group LLC is therefore approved to release Aircraft components after completion of maintenance work during this period by this Special Approval, and the work scope being limited to the Rating specified on the MOC and the latest Maintenance Capability List accepted by CAAC.

Regards,
